DTPI

Diesel Technic Partner Interface

Your direct connection to Diesel Technic – fast, flexible, fully integrated. The **Diesel Technic Partner Interface (DTPI)** is a REST API (based on JSON) that provides fully automated, real-time access to all relevant data and the order process. Seamlessly integrate Diesel Technic into your existing systems – for faster, more efficient operations.

Key Features

- ✓ **Product data** – always up to date
- ✓ **Pricing information** – real-time accuracy
- ✓ **Stock levels** – current availability at a glance
- ✓ **Address creation** – for smooth and accurate logistics
- ✓ **Order management** – place and manage orders directly via your system
- ✓ **Order history** – complete transparency on past orders
- ✓ **Order status** – keep track of every step
- ✓ **Order tracking** – follow deliveries in real time
- ✓ **Automated data updates** – no manual maintenance required
- ✓ **Usage** – fully automated integration for maximum efficiency
- ✓ **Documents** – Invoices, Delivery Notes and Credit Notes

Your Benefits

- ✓ **Real-time access** to all relevant partner and transaction data
- ✓ **Always up to date** – no more delays or outdated information
- ✓ **Automated order process** – saves time, reduces errors
- ✓ **Greater efficiency** – streamline sales, purchasing and logistics

DTPI – Connect smarter. Work faster. Grow stronger.
